environmental policy

As a family business, crossing several generations, it is important that we understand our impact on our environment and the effect that we will have on the future as well as the present.

We work to do all we can to reduce any negative impact we may have and to manage our development hand in hand with our environmental goals.

We aim to achieve this through:

- Carrying out regular assessments of our environmental impact as a fine food and drink retailer and of our working site as a whole
- Reducing the level of packaging that our products carry and encouraging customers to reduce their own use of packing within the shop
- Recycling as much of our waste as possible and completing the cycle by using recycled products where we can
- Proactively maintaining a buying policy of purchasing from local quality producers first and foremost and being aware of the impact of the products we sell and looking for opportunities to lower their impact where possible
- Reducing our energy usage through good site management, training and using and maintaining efficient equipment
- Involvement in local initiatives to increase awareness and lower negative environmental impact
- Reacting to and taking on board information and suggestions from our customers and peers that will help us achieve our aims
